

Extension Wire 10mtr - L05230

Print

This 10 meter extension wire can be used to extend the wire from a LED driver. The small connector size makes it possible to pull this wire through an installation tube.

- Click & Go system.
- Always read the manual from the driver first before extending the wire.
- For a graphical explanation for using the Click & Go system download the 'Connection scheme for Lumoluce LED lighting'
