

# RELIN

Why throw away a perfectly good cover and body? With ReLine you no longer need to replace the whole luminaire – just open up the existing cover and replace your fluorescent tube with our replacement kit. Simple, quick and above all inexpensive!

ReLine is an innovative replacement kit in two different lengths, made to easily upgrade your fluorescent luminaires. With ReLine, you get a replaceable LED and driver, as well as the possibility to choose colour temperature via DIP-switch Colour Temp. ReLine 1200 also gives you the possibility of adjusting the lumen output with DIP-switch Power. The kit comes with double sided tape and is easily fitted with both screws and tape.

Give your luminaire new life with ReLine and enjoy modern and energy-efficient LED lighting without having to replace your entire installation.

- Universal replacement kit for IP44 luminaires
- Replaceable LED and driver – built for the future
- Selectable colour temperature via DIP switch.
- Adjustable lumen output via DIP switch Power (product version 1200)
- Simple, quick and inexpensive
