

## Power supply cables for Bachmann facility systems

Cables fitted with Wieland GST18 plug-in connectors are available to connect facility products to the mains power supply. The advantages of these cables and their connectors, which are used all over the world, are flexibility in terms of length, the possibility of exchanging them should length requirements change, and availability for a variety of countries. Even extending the power supply to other power strips presents no problem and can usually be done without tools.

## Device supply cable with additional earth connection

Pre-assembled power supply cables with integrated earth connection

Earthing of the power strip is independent of the installation

Ideal in combination with STEP power strips (see from page 56)

• Table-mounted frames can be earthed independently of the power strip fitted in them
